

## **We're Alright Jack, but what about you..**

With the proposed closure of either Newent or Hobkirk House Day Care Centres the future is very uncertain regarding care for disabled and elderly residents of Kingston and Chessington. Those of us at present using the Day Care Services have been assured that our care will still continue to be provided, although what problems we will face in overcrowded accommodation remains to be seen.

We are very concerned for the long term provision of care for Kingston ratepayers who may need this service in the future. This is an issue that can affect anyone at any time, so don't sit on the fence, have a say. Ask councillors to keep both Centres open to meet the needs of the elderly - even they may need this care at some time.

These Centres are a lifeline to people on their own and provide possibly the only substantial hot healthy meal of the day. The staff at the Centres give unobtrusive daily monitoring, and help can be sought for any health problems as they are detected

To turn the excellent facilities at Newent House into offices will be a sin!
