

## The Tolworth Project Exhibition / Consultation

When - Saturday 10th October 2009, 10.00am to 4.00pm.

Where - Inside the A3 / Tolworth Roundabout.

You are invited to an exhibition / public consultation about the proposed improvements to Tolworth Broadway. Your views are important to us so please come and comment on our ideas.

Earlier this year, a public consultation told us what local residents and businesses would like to see improved on Tolworth Broadway. The Council appointed Studio Egret West as the designer to create a friendlier streetscape with strong pedestrian links and a visually striking environment; making Tolworth a great place to live, work and visit.

Three main changes have been highlighted and would be vital to the improvement of Tolworth Broadway:

**Removing the Central Barrier** - allowing pedestrians to cross the road more easily and reducing vehicle dominance.

**Creating a Greenway** - transforming the central reservation into a strong visual element where people can walk and cycle.

**Improving Pedestrian Crossing at the Roundabout** - providing surface crossings and improving the pedestrian bridge over the A3 to create better connections to Tolworth Station and leisure facilities.

## Funding

We want the first phase of the scheme to have the biggest impact through investing in the middle of the road, to:

- set the tone
- change perceptions
- make connections
- give pedestrians and cyclists priority
- uplift not only Tolworth Broadway but the whole of Tolworth

We will do more when further funding becomes available.

## Improvement - The Greenway

The most dramatic first phase of Tolworth Broadway's enhancement involves the removal of the barriers and widening the central reservation to create a space for pedestrians and cyclists. The same treatment would continue along Kingston Road to create a strong link to Tolworth Station, leisure facilities and the open space beyond.

## Integration - The Bridge

Two new surface crossings on either side of the existing footbridge over the A3 would enable the Greenway to continue across the roundabout to better connect Tolworth Broadway and facilities on Kingston Road and create a new local landmark.

## Restoration - The Roundabout

Create a safe green space with sculpted earthworks to allow for a pause when crossing the A3 rather than a left over space surrounded by roads.
